

M&M Products Company

DISTRIBUTOR INFORMATION GUIDE

OUR BEGINNINGS

M&M Products began in Atlanta in 1973 with a groundbreaking ethnic hair care product, Sta Sof Fro. Sta Sof Fro was the world's first product to help people of color easily comb, style, and maintain their hair—particularly afros—all day, without shrinkage or tangling. Since then, we've introduced many new results-driven products to keep pace with your family's changing hair and grooming needs. Now you don't have to use products with harsh chemicals to get great-looking hair and skin. All of our products are therapeutic and many contain natural ingredients to make you feel and look great.

OUR PRODUCTS

Our groundbreaking products have revolutionized hair care and men's grooming products around the world. Our hair care products are targeted towards women and children with coarse, structured hair. Our men's grooming products prevent and heal razor bumps & burn.

Thanks to our international reputation, we've trained thousands of hair stylists and consultants to educate consumers of many ethnic groups in how to use safe, natural, therapeutic products that meet their unique needs. As a result, you and your family enjoy radiant style without sacrificing health.

We use only high-quality, often natural ingredients like milk protein, omega 3, and olive, argan and sunflower oils to ensure the health of your hair and skin. In fact, many of our products actually prevent future problems.
